MIH - SkinVive Consent Form

SkinVive Consent

SkinVive by Juvéderm is an FDA-approved injectable treatment designed to improve skin smoothness and hydration using hyaluronic acid microdroplets. It is not a volumizing filler but a skin-quality enhancer intended for the cheeks and other approved areas.

Purpose of Consent

This form provides information about the SkinVive procedure, its benefits, risks, and alternatives, and obtains your voluntary consent for treatment by Jessica Thorman, APRN, FNP-C, or designated member of Midwest Integrative Health.

Procedure Details

Administered via microinjections into the dermis

Duration: Approximately 30 minutes

Results may last up to 6 months

Multiple sessions may be recommended

Risks and Side Effects

Potential risks include:

- Redness, swelling, bruising, tenderness
- Itching or discomfort
- Rare allergic reactions
- Infection or granulomas
- Asymmetry or uneven texture

Alternatives to SkinVive treatment:
